No valid information could be perceived on this target. It would help the operatives immensely if more background data was provided. If the entity is a vessel, then tell us. If it is an individual, tell us. If you, the customer, do not know, then tell us. It is very exhausting to be continuously hit with just a name. It's obvious to this viewer that the customer is attempting to identify and target an entire network. If this be the case, then please confirm this hypothesis, yea or nay. Thank you!!!
